

The Human Water Cycle Tracking Sheet

Use this sheet to keep track of your travels through the water cycle. You may roll the same location multiple times in a row, these are recorded individually.

The Human Water Cycle Results Sheet

Use this table to tally how often you landed in each location. Don't forget to submit your results at MiningMatters.ca/water-results and look at the charts there to answer the next question.

Animal	Clouds	Glacier	Groundwater	Lake	Ocean	Plant	River	Soil

Where did you spend the most time? How does that compare with everyone else's results?

Were there any locations you missed? Why do you think this happened?

Did you get stuck at any locations (roll the same thing repeatedly)?

How does your journey relate to water in real life?
